Kousha Ghodsizad

Systems & Infrastructure Architect

Amsterdam, Netherlands · +31 6 47 15 49 99 · kousha@iraven.io · kousha.dev · linkedin.com/in/kousha-ghodsizad · github.com/koushamad

SUMMARY

Systems & Infrastructure Architect / Platform Engineer with a backend engineering background and production experience across Kubernetes-based infrastructure, CI/CD, automation, observability, reliability, and distributed systems. I focus on building and improving platforms that make delivery safer, operations clearer, and backend systems easier to maintain.

My engineering style is calm, structured, and operationally mature: clarity over ambiguity, automation over repeated manual work, maintainability over short-term fixes, and reviewable architecture over accidental complexity. I contribute best through platform ownership, backend architecture, deployment reliability, technical review, and sustainable engineering practices.

EXPERIENCE

Adyen — Amsterdam, Netherlands — Jul 2023 — Present

Infrastructure Engineer — CI/CD & Platform

- Designed and improved production CI/CD and platform tooling around Kubernetes-based delivery workflows, with attention to deployment reliability and operational clarity.
- Worked with Helm, ArgoCD, Argo Workflows, GitLab/Jenkins integrations, artifact systems, and internal automation to make delivery paths safer and easier to operate.
- Built and maintained Go-based developer/platform tooling, including CLI and service integrations for controlled plugin execution and workflow automation.
- Improved deployment hardening, observability, and operational feedback loops so teams could understand merge requests, releases, logs, metrics, and post-deployment behaviour more clearly.
- Collaborated across teams on review, architecture, reliability concerns, and practical automation for production infrastructure.

Studocu — Amsterdam, Netherlands — Jul 2022 — Jul 2023

Senior Software Engineer

- Improved backend and platform-facing areas around website performance, crawler accessibility, and production reliability.
- Worked with operations and platform teams to add monitoring across local, staging, and production environments.
- Built CI/CD checks for SEO and performance testing to make release quality more repeatable and easier to validate.
- Investigated bottlenecks across application and database layers and translated findings into practical engineering improvements.

Amazon Web Services (AWS) · S3 · SNS · SQS · RDS · DevOps · PHP · Laravel · Go · Big Data · Test Driven Development (TDD) · MySQL · ElasticSearch · Redis

KolayIK — Istanbul, Turkey May 2021 — May 2022

Senior Software Engineer / Backend Team Lead

- Led backend and platform-oriented work across HR systems, expense management, data import/export, and queue-based services.
- Applied modular architecture, domain boundaries, TDD, messaging, AWS services, and Kubernetes where appropriate to improve maintainability and operational behaviour.
- Built automation for failure reporting and operational feedback, including queue handling and Slack-integrated reporting.
- Supported delivery through technical review, design direction, mentoring, and pragmatic engineering standards.

Wingie Enuygun Group — Istanbul, Turkey May 2020 — Apr 2021

Senior Software Engineer / Team Lead

- Led hotel-provider integration work and backend services for provider aggregation, search, caching, and data pipelines.
- Designed Go/gRPC services to manage concurrent provider requests and standardise hotel data from external systems.
- Improved reliability through testing practices, Elasticsearch tuning, cache-rate management, and database cluster migration work.
- Guided the team through technical review, testing workshops, and delivery decisions that balanced reliability with business needs.

Hexagonal Architecture · Microservices · Amazon Web Services (AWS) · DevOps · PHP · Go · Object-Oriented Programming (OOP) · Web Applications · Design Patterns · Big Data · Test Driven Development · MySQL · MongoDB · Symfony

Insider — Istanbul, Turkey Jun 2019 — Jun 2020

Senior Software Engineer

- Refactored newsletter and email-delivery systems from legacy structures toward clearer service boundaries.
- Worked on Go services, messaging, security remediation, and data migration across high-volume marketing data systems.
- Improved maintainability through architecture review, repository-service patterns, and clearer data-flow design.
- Built supporting services for A/B testing, spam detection, and queue-based processing.

RabbitMQ · Amazon Web Services (AWS) · DevOps · PHP · Go (Programming Language) · Object-Oriented Programming (OOP) · Design Patterns · Test Driven Development · MySQL · MongoDB · Leadership · Teamwork · Management · Redis

Bamilo — Tehran, Iran Aug 2015 — Apr 2019

Senior Software Engineer / Head of Development

- Built and led engineering work across seller tooling, warehouse operations, delivery tracking, inventory services, and internal platforms.
- Owned backend architecture, service design, team growth, and technical review for marketplace operations systems.
- Designed data migration pipelines and service improvements for inventory and seller-centre workflows.
- Helped convert operational problems into maintainable systems for logistics, warehouse, seller, and marketplace teams.

RabbitMQ · Kubernetes · GraphQL · Amazon Web Services (AWS) · DevOps · PHP · Laravel · Go (Programming Language) · Object-Oriented Programming (OOP) · Design Patterns · MySQL · MongoDB · Leadership · Management · Redis · Cassandra · Apache Kafka

Sepehr Mahan Tech — Tehran, Iran Aug 2012 — Jul 2015

Software Engineer / Senior Software Engineer

- Developed suggestion, task-management, meeting-management, form-builder, workflow, social-network, and mobile API systems.
- Focused on backend services, process automation, maintainable application foundations, and practical delivery for private and public-sector clients.
- Built the early backend and product-engineering foundation that later grew into larger platform, architecture, and leadership responsibilities.

Linux · PHP · JavaScript · Python (Programming Language) · Node.js · SQL · MySQL · Redis · MongoDB · RabbitMQ · Design Patterns · Object-Oriented Programming (OOP) · Teamwork

SELECTED PROJECTS

ChanceGoal — Product platform and backend architecture

Go API, admin/web clients, iOS, onboarding, notifications, operational tooling

- Worked across backend APIs, admin/web clients, mobile flows, local runtime automation, and service-level tests.
- Implemented backend foundations around authentication, onboarding state, notifications, persistence, and operational tooling.

Zenory.fit — Multi-platform wellness ecosystem

Next.js 15, TypeScript, Supabase, iOS (Swift), Garmin ConnectIQ, browser extension

- Built a multi-platform product spanning a Next.js marketing and web app, iOS app, Garmin ConnectIQ watch app, and a Firefox browser extension backed by Supabase.
- Designed a creator and instructor platform (Zenory Senseis) alongside feature-specific flows for meditation, sleep, music, routines, and goals.

Socc360.com — Global football intelligence platform

Next.js 15, React 19, TypeScript, Tailwind v4, iOS (Swift), real-time data integration

- Built a web and iOS product consuming a live football data API across 15 routes covering scores, fixtures, leagues, teams, players, match timelines, and editorial news.
- Designed a shared "Cobalt & Amber" design system used consistently across the web app and iOS app, including motion, typography, and colour tokens.

Pepper.com Platform Work — Marketplace microservices work · Remote / Berlin

Backend services, GraphQL flows, image service work, near-cache behaviour

- Collaborated with Supernova and microservice teams to develop features, maintain services, and improve backend behaviour.
- Redesigned and developed deal submission, product listing, and product detail flows using GraphQL.

TECHNICAL SKILLS

Backend — Go, PHP, Python, Shell, APIs, services, workers, CLIs, service boundaries, integration layers

Infrastructure & Platform — Kubernetes, Docker, Helm, ArgoCD, Argo Workflows, Argo Events, Terraform, AWS, private cloud, OpenStack, Cilium, Vault/Consul, Harbor, Nexus

CI/CD & Automation — GitLab CI, Jenkins, deployment automation, merge-request automation, artifact workflows, release guardrails, operational tooling

Data & Messaging — MySQL, PostgreSQL, Redis, RabbitMQ, Kafka, NATS, Cassandra, ClickHouse, Elasticsearch, MongoDB

Observability & Reliability — Prometheus, Grafana, metrics, logging, readiness checks, operational dashboards, rollout safety, production feedback loops

Architecture — System design, reliability engineering, automation strategy, modular architecture, domain boundaries, technical review, engineering standards

EDUCATION

BSc Computer Software Engineering — Islamic Azad University 2011 — 2015

ASc Computer Programming — Islamic Azad University 2008 — 2011
