PROFILE

Systems & Infrastructure Architect / Platform Engineer with a backend engineering background and production experience across Kubernetes-based infrastructure, CI/CD, automation, observability, reliability, and distributed systems. I focus on building and improving platforms that make delivery safer, operations clearer, and backend systems easier to maintain.

EXPERIENCE

Infrastructure Engineer — CI/CD & Platform · Adyen, Amsterdam, Netherlands — Jul 2023 — Present

Production infrastructure, CI/CD, Kubernetes-based delivery, automation, and operational reliability for a large-scale payments platform.

- Designed and improved production CI/CD and platform tooling around Kubernetes-based delivery workflows, with attention to deployment reliability and operational clarity.
- Worked with Helm, ArgoCD, Argo Workflows, GitLab/Jenkins integrations, artifact systems, and internal automation to make delivery paths safer and easier to operate.
- Built and maintained Go-based developer/platform tooling, including CLI and service integrations for controlled plugin execution and workflow automation.

Senior Software Engineer · Studocu, Amsterdam, Netherlands — Jul 2022 — Jul 2023

Backend performance, observability, CI/CD checks, and reliability improvements for a high-traffic education platform.

- Improved backend and platform-facing areas around website performance, crawler accessibility, and production reliability.
- Worked with operations and platform teams to add monitoring across local, staging, and production environments.
- Built CI/CD checks for SEO and performance testing to make release quality more repeatable and easier to validate.

Senior Software Engineer / Backend Team Lead · KolayIK, Istanbul, Turkey — May 2021 — May 2022

Backend architecture, team leadership, automation, and platform reliability for HR and operations systems.

- Led backend and platform-oriented work across HR systems, expense management, data import/export, and queue-based services.
- Applied modular architecture, domain boundaries, TDD, messaging, AWS services, and Kubernetes where appropriate to improve maintainability and operational behaviour.
- Built automation for failure reporting and operational feedback, including queue handling and Slack-integrated reporting.

Senior Software Engineer / Team Lead · Wingie Enuygun Group, Istanbul, Turkey — May 2020 — Apr 2021

Team leadership, provider integrations, Go services, search, caching, and database reliability for travel systems.

- Led hotel-provider integration work and backend services for provider aggregation, search, caching, and data pipelines.
- Designed Go/gRPC services to manage concurrent provider requests and standardise hotel data from external systems.
- Improved reliability through testing practices, Elasticsearch tuning, cache-rate management, and database cluster migration work.

Senior Software Engineer · Insider, Istanbul, Turkey — Jun 2019 — Jun 2020

Backend architecture, service refactoring, messaging, security remediation, and data migration for marketing infrastructure.

- Refactored newsletter and email-delivery systems from legacy structures toward clearer service boundaries.
- Worked on Go services, messaging, security remediation, and data migration across high-volume marketing data systems.
- Improved maintainability through architecture review, repository-service patterns, and clearer data-flow design.

Senior Software Engineer / Head of Development · Bamilo, Tehran, Iran Aug 2015 — Apr 2019

Technical ownership, backend architecture, internal platforms, logistics systems, and team leadership for an e-commerce marketplace.

- Built and led engineering work across seller tooling, warehouse operations, delivery tracking, inventory services, and internal platforms.
- Owned backend architecture, service design, team growth, and technical review for marketplace operations systems.
- Designed data migration pipelines and service improvements for inventory and seller-centre workflows.

Software Engineer / Senior Software Engineer · Sepehr Mahan Tech, Tehran, Iran Aug 2012 — Jul 2015

Early backend engineering, workflow systems, process automation, and organisational collaboration platforms.

- Developed suggestion, task-management, meeting-management, form-builder, workflow, social-network, and mobile API systems.
- Focused on backend services, process automation, maintainable application foundations, and practical delivery for private and public-sector clients.
- Built the early backend and product-engineering foundation that later grew into larger platform, architecture, and leadership responsibilities.

SELECTED PROJECTS

ChanceGoal — Worked across backend APIs, admin/web clients, mobile flows, local runtime automation, and service-level tests.

Zenory.fit — Built a multi-platform product spanning a Next.js marketing and web app, iOS app, Garmin ConnectIQ watch app, and a Firefox browser extension backed by Supabase.

Socc360.com — Built a web and iOS product consuming a live football data API across 15 routes covering scores, fixtures, leagues, teams, players, match timelines, and editorial news.

Pepper.com Platform Work — Collaborated with Supernova and microservice teams to develop features, maintain services, and improve backend behaviour.

TECHNICAL SKILLS

Backend: Go, PHP, Python, Shell, APIs, services, workers, CLIs, service boundaries, integration layers

Infrastructure & Platform: Kubernetes, Docker, Helm, ArgoCD, Argo Workflows, Argo Events, Terraform, AWS, private cloud, OpenStack, Cilium, Vault/Consul, Harbor, Nexus

CI/CD & Automation: GitLab CI, Jenkins, deployment automation, merge-request automation, artifact workflows, release guardrails, operational tooling

Data & Messaging: MySQL, PostgreSQL, Redis, RabbitMQ, Kafka, NATS, Cassandra, ClickHouse, Elasticsearch, MongoDB

Observability & Reliability: Prometheus, Grafana, metrics, logging, readiness checks, operational dashboards, rollout safety, production feedback loops

Architecture: System design, reliability engineering, automation strategy, modular architecture, domain boundaries, technical review, engineering standards

EDUCATION

BSc Computer Software Engineering — Islamic Azad University 2011 — 2015

ASc Computer Programming — Islamic Azad University 2008 — 2011
