TECHNICAL SKILLS

Backend
Go, PHP, Python, Shell, APIs, services, workers, CLIs, service boundaries, integration layers

Infrastructure & Platform
Kubernetes, Docker, Helm, ArgoCD, Argo Workflows, Argo Events, Terraform, AWS, private cloud, OpenStack, Cilium, Vault/Consul, Harbor, Nexus

CI/CD & Automation
GitLab CI, Jenkins, deployment automation, merge-request automation, artifact workflows, release guardrails, operational tooling

Data & Messaging
MySQL, PostgreSQL, Redis, RabbitMQ, Kafka, NATS, Cassandra, ClickHouse, Elasticsearch, MongoDB

Observability & Reliability
Prometheus, Grafana, metrics, logging, readiness checks, operational dashboards, rollout safety, production feedback loops

Architecture
System design, reliability engineering, automation strategy, modular architecture, domain boundaries, technical review, engineering standards

EDUCATION

BSc Computer Software Engineering
Islamic Azad University · 2011 — 2015

ASc Computer Programming
Islamic Azad University · 2008 — 2011

SUMMARY

Systems & Infrastructure Architect / Platform Engineer with a backend engineering background and production experience across Kubernetes-based infrastructure, CI/CD, automation, observability, reliability, and distributed systems. I focus on building and improving platforms that make delivery safer, operations clearer, and backend systems easier to maintain.

My engineering style is calm, structured, and operationally mature: clarity over ambiguity, automation over repeated manual work, maintainability over short-term fixes, and reviewable architecture over accidental complexity. I contribute best through platform ownership, backend architecture, deployment reliability, technical review, and sustainable engineering practices.

EXPERIENCE

Adyen
Jul 2023 — Present

Infrastructure Engineer — CI/CD & Platform · Amsterdam, Netherlands

- Designed and improved production CI/CD and platform tooling around Kubernetes-based delivery workflows, with attention to deployment reliability and operational clarity.
- Worked with Helm, ArgoCD, Argo Workflows, GitLab/Jenkins integrations, artifact systems, and internal automation to make delivery paths safer and easier to operate.
- Built and maintained Go-based developer/platform tooling, including CLI and service integrations for controlled plugin execution and workflow automation.

Studocu
Jul 2022 — Jul 2023

Senior Software Engineer · Amsterdam, Netherlands

- Improved backend and platform-facing areas around website performance, crawler accessibility, and production reliability.
- Worked with operations and platform teams to add monitoring across local, staging, and production environments.
- Built CI/CD checks for SEO and performance testing to make release quality more repeatable and easier to validate.

KolayIK
May 2021 — May 2022

Senior Software Engineer / Backend Team Lead · Istanbul, Turkey

- Led backend and platform-oriented work across HR systems, expense management, data import/export, and queue-based services.
- Applied modular architecture, domain boundaries, TDD, messaging, AWS services, and Kubernetes where appropriate to improve maintainability and operational behaviour.
- Built automation for failure reporting and operational feedback, including queue handling and Slack-integrated reporting.

Wingie Enuygun Group
May 2020 — Apr 2021

Senior Software Engineer / Team Lead · Istanbul, Turkey

- Led hotel-provider integration work and backend services for provider aggregation, search, caching, and data pipelines.
- Designed Go/gRPC services to manage concurrent provider requests and standardise hotel data from external systems.
- Improved reliability through testing practices, Elasticsearch tuning, cache-rate management, and database cluster migration work.

ENDORSEMENTS

Ryan Klann · VP of Engineering, Pepper.com
"Kousha is a developer who has very strong technical skills and has shown to be able to take responsibility for a project and be relied upon. If there is something…"

Nikola Barac · Head of Software Engineering, Pepper.com
"Kousha worked on pepper.com features as a senior PHP developer and took ownership of one of our most important microservices written in Go. He demonstrated passion…"

Insider
Jun 2019 — Jun 2020

Senior Software Engineer · Istanbul, Turkey

- Refactored newsletter and email-delivery systems from legacy structures toward clearer service boundaries.
- Worked on Go services, messaging, security remediation, and data migration across high-volume marketing data systems.
- Improved maintainability through architecture review, repository-service patterns, and clearer data-flow design.

Bamilo
Aug 2015 — Apr 2019

Senior Software Engineer / Head of Development · Tehran, Iran

- Built and led engineering work across seller tooling, warehouse operations, delivery tracking, inventory services, and internal platforms.
- Owned backend architecture, service design, team growth, and technical review for marketplace operations systems.
- Designed data migration pipelines and service improvements for inventory and seller-centre workflows.

Sepehr Mahan Tech
Aug 2012 — Jul 2015

Software Engineer / Senior Software Engineer · Tehran, Iran

- Developed suggestion, task-management, meeting-management, form-builder, workflow, social-network, and mobile API systems.
- Focused on backend services, process automation, maintainable application foundations, and practical delivery for private and public-sector clients.
- Built the early backend and product-engineering foundation that later grew into larger platform, architecture, and leadership responsibilities.

SELECTED PROJECTS

ChanceGoal
Product platform and backend architecture

- Worked across backend APIs, admin/web clients, mobile flows, local runtime automation, and service-level tests.

Zenory.fit
Multi-platform wellness ecosystem

- Built a multi-platform product spanning a Next.js marketing and web app, iOS app, Garmin ConnectIQ watch app, and a Firefox browser extension backed by Supabase.

Socc360.com
Global football intelligence platform

- Built a web and iOS product consuming a live football data API across 15 routes covering scores, fixtures, leagues, teams, players, match timelines, and editorial news.

Pepper.com Platform Work
Marketplace microservices work · Remote / Berlin

- Collaborated with Supernova and microservice teams to develop features, maintain services, and improve backend behaviour.
